

## Project Sunset - Mission Profile FINAL

The Gestalt Navy and people have to thank you. You are our best hope for salvaging our civilization.

**With** your initial missions completed, you are each being provided specialized databases and access codes. With this information it is hoped you will be able to expand your operations to further assist in determining what is happening, and how to counteract this event.

You have been provided databases for:

- Local Astrogation
- General Sciences
- Military Operations
- Ship design and common colony structure requirements
- Population centers
- Resource maps

Unfortunately at this time we do not have the authorization keys for intersystem travel. This was managed by an outstation system which we have lost contact with. To leave the local stellar space you will have to locate and obtain these keys for yourself. To **this** end, you will need to know the Access Code "Valor" when challenged by the system. It will provide the necessary programming to allow engagement of **your** drives to intersystem functionality.

For your final mission call, we ask that you take this information, investigate the Lunar Shipyards at L4 and report on their status. There will be an autofactory there for shipyard construction, with high end 3D printing systems. Locate the system, extract the print heads, and return them to this station before you go forth on full investigation. If possible, there should also be drone systems that can ferry the resources back to low orbit near the shipyard and allow us some modicum of their use, either bringing planetside before it is too late, or marshalling for other use.

When those are done, we will provide **you** with the final access keys to obtain what information you may need.

This is your Commander, signing out. Good luck, Project Sunset.
